SUMMARY

- Performance Engineer with 15 years of experience in **Performance and Resiliency engineering**, for leading industries and product companies
- Involved in **performance engineering, architecture discussions, performance testing, SRE and observability tools implementation** for large scale distributed applications that involved **Cloud**, micro services and related tools that involve **UI and backend of the applications**
- **Working on the integration of AI tools and Agents for the automation of performance bottleneck identification**
- Involved in server resources **capacity planning**, hardware **benchmarking** with data analysis
- Handled **large scale projects** with responsibilities to implement resiliency transformation solutions, that impacts the key nature of the applications
- Experienced in working with product teams / clients as **individual contributor mostly** with development, database and other integration teams for the performance initiatives and performance engineering
- Worked in high SLA resolution MTTR environments
- Being part of **cloud** applications team, provided inputs for setting up the right sizing systems for the applications infrastructure along with traditional performance **RCA** to reduce the overall operating cost
- Learnt new technologies at a faster pace for quick implementation of performance assessment
- Interested in development and implementation new tools and frameworks

TOOLS & TECHNOLOGY

- **Observability & Monitoring** – Grafana, Dynatrace, Splunk, AppDynamics, Sumo Logic, Jaeger, Open Telemetry, Prometheus, IBM PMAT, IBM TDA VMStat, IO Stat, Top, Visual VM, Jmap, Visual VM, Nmon, htop, sar tools, AWS Cloud Watch, TeamQuest, Perfmon
- **AI Agents and Tools**: Langgraph, Cursor, RAG based tools
- **Performance Testing** - LoadRunner, Jmeter, Neoload, Gatling
- **Cloud & Product Platforms** - **AWS**, Duck Creek, Guidewire, IBM Cognos
- **CI/CD** with Jenkins, AWS Code Pipeline, CodeBuild
- **UI Performance:** Google lighthouse, Fiddler, HTTP Watch, Sitespeed, DOM Performance API
- **Logging and Tracing:** AWS X-Ray, Open Telemetry, Jaeger
- **App/ Server Platforms –** Java
- **Programming Languages** – Python, Java, JS
- **OS Platforms** -Mac, Linux (RHEL, Ubuntu), Windows
- **Code Editors:** Cursor, VS Code, Jupyter notebook, Intellij, Pycharm
- **Micro Services Enablers:** Docker, Kubernetes, Grafana, PCF
- **Database:** Oracle (AWR Analysis), MySQL

Key Roles and Contributions as S/W Performance Engineer & SRE

- Helping teams solve software performance problems of large-scale applications in production with incident analysis and support
- Identifying the performance bottlenecks and outage root causes by leveraging AI and other logs, dashboards , metrics, etc.
- Developing jupyter notebooks for doing the data analysis and pattern identification and applying resiliency guardrails to the applications
- **Automated performance monitoring** of end-to-end applications stack including on-prem, cloud servers by pushing AWS cloud watch data to Dynatrace using Amazon kinesis firehose setup – automated the infra creation with AWS Cloud Formation (IaaC)
- Developed codebase in Node JS for **integrating Google lighthouse** for UI performance monitoring and integrated with QA/UAT deployment pipeline and streaming the data to AWS S3 bucket
- **Defined SLA for Cloud Watch alerts** for key applications and components in the application architecture and created the alerts and documented

Key Roles and Contributions as S/W Performance Engineer & SRE

- Developed tools for extracting frontend performance information with various DOM events using **DOM Performance APIs** (Navigation timing and Resource timing APIs) with selenium code for automated metric information and streaming the data to external dashboard via API calls
- Primary contributor from Cognizant for external **CI/CD workshop hosted by Amazon Web Services** and built the CI/CD pipelines using AWS Native components for Performance, Security and Accessibility Testing using technologies such as Docker and Python (Pandas and Requests Module) Reference: https://cognizant.awsworkshop.io
- Developed more than 100 queries in **Splunk** for all the key enterprise microservices and integrated Splunk performance and error alerts with ServiceNow for creating automated incidents
- Worked as **SRE** for enterprise Splunk team for a US based insurance client
- Worked on multiple **proof-of-concepts** for various client and CoE practice for observability, CI/CD, mobile performance and developing mock servers (in technologies such as express (JS), python flask and FastAPI and deployed them in K8S for quick benchmarking and other initiatives)
- **Developed many in-house utilities** in python for monitoring and automation to enhance performance related tasks and reporting and also developed custom dashboards using NextJS / JavaScript
- Worked as a consultant for implementing new performance tools for various stacks and savings costs for performance engineering such as implementing Grafana, benchmarking and capacity assessment for Open Telemetry local and central collectors
- Worked for benchmarking AWS **Graviton** and **Intel based CPU chips for AWS RDS** DBs running on MySQL and Postgresql and presented the finding to Amazon RDS product teams and client DB teams for better performance and cost savings
- Worked for the benchmarking of AWS RDS Proxy for various microservices
- Defined end-to-end performance engineering strategy for ETL at an enterprise level that includes ETL tuning and Oracle query Tuning
- Contributed for implementing continuous performance testing for various tool combinations and platforms such as in Jenkins, Docker, Linux, JMeter, Load Runner, Neo load, Groovy, Elastic Search, Grafana, Influx

CERTIFICATIONS

Key Roles and Contributions as S/W Performance Engineer & SRE

Employer	Role	Designation	Total Exp.	Timeline
Workday. Inc	Sr. Software Development Engineer (Performance)	Sr. Software Development Engineer (Performance)	1.5 yeas	June 2024 – Till Date
Cognizant Technology Solutions US Corporation	Software Performance Engineer	Senior Project Manager	1.5 Years	Dec 2022 – May 2024
Cognizant Technology Solutions India Private Ltd	Software Performance Engineer	Senior Project Manager	12 Years	Jul 2010 – Dec 2022

Education Details

Degree	College	Duration
B.E. Computer Science and Engineering	Hindusthan College of Engg. & Tech. Coimbatore India	2006 – 2010

Personal Profile

First & Last Name	DHINESHBABU MUTHURAJ
Gender	Male
Nationality	Indian
Current Residence	Fremont, California
Contact Number	4804765025
Email	kanudhinesh@gmail.com
